

widget

```
classDiagram
    class widget
    class container
    container --|> widget
```

The diagram consists of two rectangular boxes. The top box is labeled 'widget' and the bottom box is labeled 'container'. A vertical line connects the bottom center of the 'container' box to the bottom center of the 'widget' box. At the point where the line meets the 'widget' box, there is a small, hollow, upward-pointing triangle, which is a standard UML notation for inheritance.
